XTrack EQ32, VST3 plugin providing an equalizer 32 bands, is available in beta version

XTrack EQ32 is a VST3 audio effect plugin which provides an equalizer 32 bands with a low CPU usage. Whereas most of equalizers support only stereo control, XTrack EQ32 gives you the possibility to control a Mono, a Stereo, a LRS, a Quatro and an 8.0 Music system. Equalization presets can be saved in a specific file in XML format. These presets are editable and can be loaded easily by the plugin via its user interface. XTrack EQ32 has also a vumeter for input and output signal.
